Dear Teachers:

We are excited to announce a new resource available to our school—PebbleGo! PebbleGo is a research database specifically designed to meet the needs of K-2 learners. It helps students learn foundational research skills, plus PebbleGo provides critical early-reader supports like audio voice-overs and text-highlighting.

Accessing this resource has never been so easy!

**Simply go to www.PebbleGo.com
and use our school's login and password:**

Login:

Password:

Once you login, you will see which databases our school subscribes to: Animals, Science, Biographies, Social Studies, or Dinosaurs. Once you start to explore, you will notice how the easy navigation makes it inviting for students to discover new information: bolded words have glossary definitions and pronunciations with engaging spoken-word audio and text-highlighting; extended learning like videos and/or audio clips, teaching students how to cite their sources, and "share what you know" printables ideal for first reports; and features like videos and fun games will keep our students engaged and learning.

Not only is PebbleGo great for our K-2 researchers, but it's also brimming with educator resources and administration tools for you! PebbleGo is correlated to curriculum standards and includes ideas for lesson plans and reproducibles for each database. Plus, the educator resources section has a school-to-home letter designed for parents to learn about PebbleGo: how it's used, what it's for, and how to access it.

Best of all, PebbleGo is a school-to-home resource—students can use it anywhere with an internet connection. Did your student forget to check out a book for a report due tomorrow? Encourage them to use PebbleGo! Our school's login and password (above) provides your student the exact same access as in school.

I truly hope you're as thrilled as I am about having access to this incredible database for our K-2 learners.

If you have any questions or feedback,
please feel free to contact me.
